

Press Release

Bradshaw Medical, Inc.

March 3, 2010

Bradshaw Medical Announces New Hires:

I am pleased to announce that the Bradshaw Medical family is growing. Please join Keith and I in welcoming the following industry veterans to our organization in the coming weeks:

Jim Corin

Jim has joined us as Director of Engineering. He earned a BSME and Master of Science in Biomechanical Engineering from the University of Texas-Arlington and Southwestern Medical School in Dallas, TX.

Mr. Corin's extensive 20+ year background in the spinal implant industry will further BMI's commitment to innovation and customer satisfaction. He has held various positions at several spine implant companies including LANX, SpineCore, American Medical Electronics (AME), Surgical Dynamics, Cross Medical, Orthomet, and Texas Scottish Rite Hospital. He holds numerous patents in the spine field including the invention of the BAK implant (1st Vertebral Cage), and a licensed Stryker product.

Jim will relocate from Colorado after living there the last 15 years. He is a native of Windsor, Ontario, Canada, loves ice-hockey (enjoyed seeing Canada win Olympic Gold), and is a home remodeler. He and his wife Martia, a Wisconsin native, love the outdoors and are looking forward to the distinctive four seasons, the wonderful lakes, nature, and being near family. Jim and Martia will make the Kenosha area home and plan to enjoy the Midwest outdoors in their usual style of backpacking, golfing, skiing (snow and water), snowshoeing, and road biking.

Mark Bakula

Mark has joined us as Director of Research and Development. He comes to BMI from Johnson Controls where he was employed for 15 years. He held a variety of positions with JCI, including Chief Engineer of seat designs, Benchmarking, and Lean Engineering. Mark led the Design and Development team that produced the front seats for the Viper, PT Cruiser, and Jeep Liberty motor vehicles. Prior to this, he was the Plant Manager at Snap-on Tools Medical Products Division.

Mark is a graduate (B.S.M.E.-Biomedical minor, B.S.E.E.) of Marquette University and in addition has degrees in Automotive Engineering and Computer Technology. Mark holds a number of automotive tool patents including the Snap-on ratcheting screwdriver which is still in production today 23 years later and continues to be one of their top sellers on the dealer trucks. This same mechanism was the very first used in the orthopedic industry in the Mid-80's. Mark also worked for Harley-Davidson Motor Company for 6 years and was on the development team that produced the belt drive system that has been used on almost all Harley-Davidson motorcycles produced since 1981. Mark, his wife Kathy of 29 years along with their daughter Sarah will be re-locating from Michigan and are looking forward to being "home" among family and friends. Mark is a former professional skydiver and pilot, he now enjoys hobbies such as restoring antique motorcycles and pinball machines.

Steven Raith

Steven has joined us as the Regulatory Affairs / Quality Assurance Manager. He has held positions in Quality Management and ISO implementation for the past 15 years in Medical Device Manufacturing, Engine Manufacturing, and the Heavy Construction industries. Steven started his career as a Journeyman Tool & Die Maker in the automotive industry and attended the Milwaukee School of Engineering with a B.S.M.E. Steven is also a Certified Engineer with ASQ and a Certified Auditor for the Wisconsin Forward Award quality program. Steven's most recent accomplishments included certification in Six Sigma Green Belt training from Purdue University.

Steven and his family reside in Kenosha. He enjoys golf, fishing, and hunting.

Bob Schrandt

Bob has joined us as a Prototype Machinist. He has held a variety of positions at a local medical instrument company the last 10 years with extensive experience in assembly, manual turn, and R & D machining operations. Prior to this, he worked at Snap-on Medical performing similar duties for a period of 9 years.

Bob resides in Kenosha and enjoys riding his Harley, hunting, and spending time with his family.

Again, please welcome these outstanding individuals into the fold as we continue striving to serve the Spinal and Orthopedic industry as their preferred instrumentation supplier of choice into 2010 and beyond.
