Bradshaw Medical, Inc.

Rule #1: If we don't take care of our customers, someone else will!

Who is Bradshaw Medical?

Bradshaw Medical designs and manufactures hand-held instruments for orthopedic surgeons, specializing in spinal surgery instruments. The company currently holds nine patents on its "Total-Control" instruments, and has several others pending. "We're taking the instruments that were the status quo for many years in the industry ... and we develop a better product," Guy Bradshaw, CEO said. Bradshaw said the key to the company's success is both the innovation of its designs and delivering instruments to customers quickly. "Maintaining short lead times," he said. "That is really the key in this business."

Bradshaw Medical Inc., established in 2006, has purchased a four-acre lot in the Business Park of Kenosha and plans to build a 60,000-square-foot headquarters and manufacturing facility. The company plans to break ground on Phase I of the building this spring, with an estimated completion date of March 2010. The new facility will be double the size of the existing building, with space for manufacturing, engineering and business operations.

In the News

2/18/2009

Bradshaw Medical was recommended for approval by the British Standards Institute (BSI) to be [ISO-13485:2003 certified](#) for their quality management system specific to medical devices.

FEATURED PRODUCT

Internal Adapter Technology

BMI has released its new Internal Adapter Technology to the market. To attach the shaft with the instrument, simply insert into the handle and it locks securely in place. There is no need to pull back the collar until the shaft is ready to be disengaged.

Patent #US D562,665 S
